

CBECS: FOOD SERVICE

The CBECS classifies buildings according to their “principal building activity (PBA)” at the time when the survey is completed. The PBA is defined as the primary business, commerce, or function within each building. For projects with multiple activity classifications, the activity that occupies the most floorspace ultimately defines the usage type category. Buildings are also classified into more specific sub-categories of activities, which are reflected in the “National Office Activity Breakdown” chart below.

The CBECS website specifically defines the education PBA as “Buildings used for selling prepared food and beverages”. This includes the following building types; Fast Food, Restaurant or Cafeteria, Bar, Pub, or Lounge, Catering Service, Coffee, Bagel or Doughnut shop and Ice Cream or Frozen Yogurt shop.

More information on building activity definitions can be found on the CBECS website located here:
